Net Zero Waste  
Level 2 : Operational Waste (measured)  
Including 0% Offset Purchased

**Waterfall Mall is situated in the heart of the North West province, next to the R24 Johannesburg on the far South Eastern side of the city. Since Waterfall Mall first opened in September 1998, it has offered the perfect shopping and entertainment destination for both young and old. Boasting over 124 stores, its convenient location and comprehensive tenant mix makes it a cornerstone of the community and a preferred destination for retail and recreation.**

**Sustainable building features include:**

Waterfall Mall achieved 90% diversion from landfill through a strategic blend of waste minimisation, recycling, and recovery initiatives.

Waste management strategies included:

- Quarterly tenant communications featuring insights, updates, and practical tips
- On-site separation of recyclables
- Composting of organic waste

The building’s progress toward its Net Zero waste goal was significantly supported by rigorous waste tracking and reporting, along with innovative diversion techniques implemented by the waste contractor.
